CAM's Commitment, Professionalism, and Accountability

Charutar Arogya Mandal (CAM) is structured so as to reflect its professionalism on the one hand and accountability to the community on the other.

Registered as a Trust and a Society, CAM's properties are managed by a Board of Trustees comprising Shri Nitinbhai R Desai and Shri Prayasvinbhai B Patel.

CAM's policies are decided by a Governing Body headed by CAM's Chairman & Executive Head, Dr. Amrita Patel.

The Governing Body is part of and functions under the purview of the wider Governing Council, which includes representatives of donors, sister-institutions and members of CAM.

The President of CAM, Shri Hasmukhbhai Shah, chairs the Governing Council meetings.

The Governing Council, in turn, reports to the General Body. (The total number of members was 1,853 as on 31st March 2017). In this way, the Community participates in the running of the institution.

Reaching the Last Person in the Last Village

The mandate of the Charutar Arogya Mandal to make quality yet affordable healthcare accessible to the rural community necessitates that it does not restrict itself to only those places where it has set up healthcare facilities. Beyond the tertiary care facility at Shree Krishna Hospital at Karamsad or the secondary care facilities at its extension centres (notably the Sevalia Hospital), the Mandal's mission is to explore ways to extend its services to the very doorsteps of patients in outlying villages.

Over the years, a number of efforts have been made. As early as in 1986, the Mandal implemented a UNICEF-sponsored programme for Reproductive & Child Healthcare. In the 1990s, it collaborated with Tribhuvandas Foundation to launch a Cancer Awareness, Early Detection and Treatment Programme in the villages of Anand and Kheda districts. But the most significant leap in this direction is the creation of a model of vertical integration in healthcare delivery – a programme named SPARSH.

SPARSH, or Shree Krishna Hospital's Programme for Advancement of Rural and Social Health, is designed to create systems and processes that enable the last person in each of the villages it operates in to access appropriate healthcare facilities. The Mandal has chosen to work on a set of diseases together named Non-Communicable Diseases or NCDs, to create this model. Its choice of NCDs was not just because there are not too many noteworthy systematic efforts on the part of any government or non-government agencies to screen and control these diseases anywhere in the country, but also because NCDs present an opportunity to engage with rural communities on a long-term and sustained basis. Cancer, hypertension and diabetes are some of these NCDs, with many chronic patients suffering from them. The reality is these are lifestyle diseases which can be easily prevented but somehow are not taken seriously.

SPARSH is now active in 90 villages in three clusters of 30 villages each. These clusters are served by a secondary care facility which in turn is linked to Shree Krishna Hospital. In each village, the Mandal has positioned a trained Health Worker who is equipped with educational material and supplies that enable her to do her work effectively and efficiently. On her routine visits, she carries a tablet with a specially-designed application that enables her to document her work, educate households with uploaded videos and even to

contact qualified medical professionals at the secondary or tertiary healthcare facilities to resolve a problem, should she find one that she cannot deal with. She goes through refresher courses periodically.

Patients who have been screened at a diagnostic camp held about once every month in each village by a mobile medical team from the secondary care centres, can volunteer to enrol themselves in the programme. The Health Worker makes a monthly home visit to these patients, monitoring their vitals and replenishing their medicines based on the doctor's prescriptions.

The work of the Village Health Workers is but one feature of SPARSH. The relevant section in the *Annual Report* covers other aspects including the programme's achievements thus far.

What is most exciting is the promise SPARSH holds out to bring about a significant difference in the lives of those it was created to serve. In the process, it could become a model for any institution with the same mandate – perhaps even governments – to replicate it using SPARSH's structure, systems and processes. But, as Charutar Arogya Mandal recognises, for this to happen, a lot more has to be done.

To begin with, the systems and processes would need to be tested and retested to ensure they stand the test of time, the variations in quality of persons who would operate it, and the various situations and circumstances within which they operate. The programme also needs to be more technology-enabled so that not only are the advances in medicine easily made available to the community but so that the documentation and monitoring systems are made more robust.

Then there is a need to expand the programme geographically and in its range so that the impact of the programme can be properly gauged thereupon. From the present 90 villages that it presently covers, SPARSH hopes to add 60 more villages over the next 2-3 years, taking the number of lives it touches from the present 300,000 to about half a million. It also hopes to add Chronic Obstructive Pulmonary Disease (COPD), palliative care, and mental disorders to the NCDs it presently works on.

In this reaching out, Charutar Arogya Mandal has sought to achieve a number of objectives, but none more important than living its motto 'Solace for the Suffering' – more purposefully, more effectively, and more satisfyingly.

Patient Care

Quality at an Affordable Cost

Charutar Arogya Mandal (CAM), founded in 1972, gave concrete shape to founder Chairman and former Union Minister Dr. H.M. Patel's dream to provide the best medical care and facilities for medical education in rural Gujarat. Today, 45 years later, the Mandal's Shree Krishna Hospital is one of the most modern and professional healthcare centres for medical facilities in Gujarat.

Dr. Patel's motto, 'Solace for the Suffering', has become the cornerstone of all Charutar Arogya Mandal's activities. CAM's ongoing mission is to offer more and more patients comprehensive healthcare with commitment and compassion at an affordable cost while keeping abreast of state-of-the-art technology. With the establishment of the Shree Krishna

Hospital in 1981, the community, especially the less privileged, was assured of quality treatment at an affordable cost. The Hospital provides special subsidised services for economically-challenged persons. For example, it does not charge for outpatient consultation and registration, and the treatment in General Wards is free of cost.

Shree Krishna Hospital is accredited by the NABH (National Accreditation Board for Hospitals & Healthcare Providers) and has facilities like ICUs, Green OTs, a Trauma Centre, MRI and CT scan machines, also labs and a blood bank. The Hospital also houses a state-of-the-art Cardiac Centre and Cancer Centre. A recent addition is the Privilege Centre which provides personalised treatment in a tasteful ambience matching the best of city hospitals.

SHREE KRISHNA HOSPITAL

Multiple Schemes for the Needy

Patient care has always been the cornerstone of all activities at Charutar Arogya Mandal.

To continue giving world-class treatment at affordable rates significant steps were taken during the year:

- The Hospital introduced its most patient-friendly product, the 'Aashirwad Wards', which offers the maximum healthcare advantage to the needy. In these Aashirwad general wards, the entire treatment, not including medicines, implants and consumables, is provided free of cost. 60% or 450 of the 720 beds in the Hospital are now earmarked for the Aashirwad Wards.

With the introduction of Aashirwad Wards and related schemes offering patient care at highly affordable rates, the services of the Hospital get broadly categorised into two: Aashirwad Services and Privilege Services. Patients coming to the Hospital for any form of medical aid can choose the type of service they would prefer according to their financial capacity.

Shree Krishna Hospital's newly introduced and most-friendly product is 'Aashirwad Wards' – 450 of the 720 beds offer free treatment.

- Another scheme, the 'Jan Arogya Yojana', was introduced to provide services at affordable rates for those patients whose monthly family income is less than Rs. 10,000. The scheme offers a host of benefits in the general services including free registration and a substantial waiver in investigation charges for lab and imaging on an outpatient basis. It also offers waivers on hospitalization to men at 60% of cost and 100% to women and children in addition to 60% and 75% waiver in ICU treatment to each respectively. The scheme has over 20,233 members enrolled till date.
- To make treatment of chronic diseases like diabetes, hypertension, thyroid, kidney conditions, obesity, asthma and COPD (Chronic Obstructive Pulmonary Disease) affordable, another scheme, 'Arogyashree', was introduced with Regular and Premium programmes. The scheme offers waivers for outpatient and inpatient treatment, medicines, investigations and special screening packages at half rates. There are special clinics for each condition.

At a Glance

The Shree Krishna Hospital served **391,480** patients through its outpatient departments, and **37,080** patients in the indoor departments.

There were **5,708** admissions in the Intensive Care Units.

Nearly **14,150** cases were treated at the Trauma Centre.

8,448 surgeries were performed – **1,069** supra-major, **2,462** major and **4,917** minor.

- Palliative care services were launched on OPD basis where patients with terminal diseases and deteriorating geriatric conditions can be served. The services are jointly run by the Departments of Anaesthesia, Community Medicine, and Extension Programmes. Home care services are also provided in villages adopted by the Mandal.
- The Hospital's very own social security scheme, 'Krupa Arogya Suraksha', has 35,212 members to date. During the year gone by, 14,636 members were added.

Some Other Achievements

- The Bhoomi Poojan ceremony of the Critical Care Centre was performed on 14th February

- by Shri Vijaybhai Patel, co-chairman of the Shantaben Foundation, and his wife Smt. Smitaben Patel, who are the major donors, along with other donors Shri Subir Patel and Shri Vipin Patel. With the completion of this Critical Care Centre with its 150 beds, the Hospital will be the State's first to have the largest capacity of critical care services.
- The Hospital facilitated a liver transplant procedure for the first time. The liver of a patient brought to the Hospital in brain-dead condition was donated with the consent of relatives and transported to Ahmedabad where the immediate transplant saved a life.
- The blood bank acquired a new machine to conduct apheresis, a procedure to collect

Through its outpatient departments, Shree Krishna Hospital continues to offer affordable care to thousands of underprivileged patients.

Quest for Quality Care

Shree Krishna Hospital continued its quest to achieve the highest standards of quality. The Hospital was recognised as the Best Hospital with a Medical College at the second edition of Express Public Health Awards. For the second consecutive year, its eco-friendly strategies won it the prestigious Green Hospital Award conferred by the Association of Healthcare Providers India (AHPI). The NABH accreditation for Nursing Excellence was another major achievement.

The Quality Improvement Group continued its efforts in initiating and maintaining the standards of quality care in the Hospital services.

Regular assessments and monitoring of quality parameters beyond any prescribed accreditation requirements in patient care are carried out regularly by the group. Essential changes for improvement are introduced as and when required.

only platelets from donors instead of whole blood. This method is particularly useful in the treatment of dengue patients.

- The heroes of our institution – the doctors – were felicitated on 1st July, that is Doctors' Day. The day was celebrated in gratitude to these brave men and women who dedicate themselves 24x7 to the medical field to provide solace to the suffering. Special thank-you cards along with personalised mugs were presented to all the doctors and residents in the Hospital, college and extension centres.

- The Hospital is committed to a judicious use of natural resources. During the year four sand-pits were constructed in the campus to harvest rainwater. Alongside, there have been continuous efforts aimed at prudent use of water. As a result, despite the nearly 10% increase in footfalls in the Hospital and a significant increase in civil works being undertaken, the consumption of water has increased only by 4% during the year. Interestingly, thanks to the conservation efforts, the consumption of water has decreased by 12% in the last six years.

Recognised as the Best Hospital with a Medical College, Shree Krishna Hospital assures quality care to all.

RAMANBHAI GOKAL PRIVILEGE CENTRE

Since its inauguration in 2014, the Ramanbhai Gokal Privilege Centre has been offering personalised care and high-end comfort to patients. The revenue earned from the Centre goes towards meeting the deficit incurred in treating economically disadvantaged patients.

A unique loyalty programme – the Privilege Club with Annual and Lifetime memberships – was introduced during the year for patients of the Privilege Centre. Members become eligible for a host of benefits in the services at the Centre in addition to other special offers by business partners of the programme.

Laser procedures offering various skin improvement modalities were introduced during the year in the Skin department.

The Ramanbhai Gokal Privilege Centre treated **29,506** outdoor patients and **2,441** indoor patients. Around **6,000** members enrolled in the Centre's preventive health check-up programme, 'Hello Health'.

The Ramanbhai Gokal Privilege Centre provides personalised care and premium facilities.

BHANUBHAI AND MADHUBEN PATEL CARDIAC CENTRE

- For the first time in India, a one-day young baby was operated with Norwood procedure for a rare heart disease known as hypoplastic left heart syndrome, where the left side of the heart is not developed.
- For the first time in the region, the technique of minimal access surgery was utilised to operate upon the heart of a 26-year young patient with a critical heart condition.
- To commemorate its Eighth Foundation Day,

the Healthy Heart Walkathon was organised for the second consecutive year with over 1,700 supporters participating. The flagship event has been garnering enormous enthusiasm and support from the community.

The Centre saw **8,090** patients on outdoor basis, conducted **237** adult surgeries and **192** paediatric surgeries in addition to **748** cath procedures.

MANIBHAI SHIVABHAI PATEL CANCER CENTRE

In a rare case a three-month baby was brought to the Hospital with Wilms' tumour, a type of childhood kidney cancer. A complex surgery by the Centre's cancer surgeon saved this precious life and revived the hopes of the desperate parents.

The Medical Oncology service came across an unusual case of a 30-year male having typical symptoms which was subsequently diagnosed as Non-Hodgkin's lymphoma – a type of blood cancer but complicated by an advanced stage of HIV infection. Unfortunately, the wife too was detected to have contracted the infection – and fortunately, their only daughter, three years of age, was found to be not infected. The treatment was both critical and more expensive because of the HIV infection. CAM took up the challenge to save the patient and the family. He was given

the best treatment free of cost, thanks to funds raised by the institution and significant contributions and support from his community. This is an excellent example of caregivers and the community joining hands to save precious lives.

The Centre celebrated its Foundation Day with great enthusiasm. The event saw a huge participation from former patients of the Centre as also other staff members of the Mandal. Patients who had completed their treatment and a few who were still undergoing treatment shared their experiences, which served to boosting the spirits of all present.

The Centre treated **18,797** outpatients, out of which **3,758** were seen by Radiation Oncology, **10,804** by Medical Oncology and **493** by Surgical Oncology.

The Chemotherapy Day Care Centre: Patients include those who are treated free under the Mukhyamantri Amrutum Yojana.

Beyond Hospital Walls

The Hospital believes in taking quality health-care to people and places where it is not readily available. During the year there were many such outreach activities organised which benefitted patients.

- 24 eye camps were organised in villages with 57 patients undergoing free cataract surgeries.
- Fifteen multi-speciality camps were organised in villages with nearly 2,875 patients participating. In 14 of these camps generous sponsors made it possible to distribute medicines free of cost.
- Two super-speciality camps were organised at Bhuj with support from the Bidada Trust.
- Six camps were organised to screen and identify cancer and cardiac patients from villages who could be offered free treatment at the Hospital under the Mukhyamantri Amrutum Yojana.

- Fourteen camps were organised in various schools having Krupa memberships offering students free consultations for eyes, skin and teeth.
- A one-day camp was organised at Barwani in Madhya Pradesh where consultants from Medicine, Neurology, Orthopaedics, Cardiology and General Surgery provided services. Nearly 170 patients benefitted from this camp.

Making Treatment Affordable

Shree Krishna Hospital treated about **2,495** cancer and **581** cardiac patients under the Mukhyamantri Amrutum Yojana (MA Scheme) during the year. Owing to the seriousness of the diseases, the treatment costs were way beyond the compensation received from the State government, hence the Hospital contributed **Rs. 259.56 lakh** of its own funds.

Shree Krishna Hospital reaches out to rural areas – organising Health Camps in villages throughout the year.

In Pursuit of Excellence

The Mandal has consistently pursued activities that promise improved quality of care and standards so as to benefit patients coming to the Hospital. The formation of various strategic functional groups with a focused mandate, play a key role in attaining the larger goal of all-round excellence. The cohesive efforts of these groups have resulted in various significant developments during the year:

The **Efficient Care Group** continued to implement the indigenously developed software SOLACE across all the wards, OPD and nursing levels so that it runs smoothly. With repeated training and orientation across all levels of care-givers – the consultants, residents and nurses – the documentation of patient care in the Hospital is now almost 100% paper-free.

The **Rational Care Group**, through the Medical Boards, monitored all the critical incidences that happened during the year. This was followed by timely intervention, development of guidelines, protocols and check-lists to ensure future compliance at all levels of patient care.

The group played a significant role in the development and introduction of a Massive Transfusion Protocol in the Hospital which makes possible speedy and efficient care in cases where the patient has had enormous blood loss owing to poly-trauma, critical delivery,

haemorrhage, vascular injury, during neurosurgeries, etc. The prescription audit findings were communicated for future adherence at OPD and IPD levels.

The continuous audits of infection-control practices have resulted in decreased levels of hospital-acquired infections. The rate of hospital-acquired infections at our Hospital is far below levels found for general hospitals across Asia. The group ensured review of the antibiotic policy and its compliance at all levels of patient care.

The **Affordable Care Group** persevered in effective cost reduction efforts in key areas including a system of recalling unconsumed drugs from patients; reduction in the cost of cancer drugs; standardization of packages for common surgical conditions; regulation of high cost investigations with the consent of consultants; and reduction of the length of stay of patients in the Hospital.

The **Humane Care Group** which had introduced 'Code Krishna' practice garnered heart-warming responses from caregivers of patients and relatives. This has resulted in consolidating this practice to cover the entire pre-terminal period of critical illness as an 'Extended Code Krishna'. A research paper on this subject has been accepted for publication in the *Indian Journal of Medical Ethics*.

Code Krishna

The Hospital received some heart-warming responses from relatives of patients who witnessed the Code Krishna Practice:

“The practice provides the much needed humane touch in an era of high tech medicine, and the solace it offers is very deeply touching.”

“It is far exceeding expectations in most crucial moments of Hospitalization, very rare to be found anywhere.”

“It was beyond her wildest imagination that the treating team will stand with them in silence and recite a prayer solemnly observing the moment of death inside the critical care unit.”

“I was deeply moved by the spontaneity with which the whole team quickly gathered, and the care of dead has to be like this always.”

Medical Education Learning with a Difference

This is medical education with a difference. The medical educational institutions of Charutar Arogya Mandal have made it their mission to equip young students with not only technical knowledge and skills but to light in them a spirit of nobility that elevates the profession and inculcates sensitivity for those in need.

Professional governance of the educational process covers the entire range of medical education from curriculum development and clinical training to student assessment and support. Guiding the process and planning are medical education experts from CAM's own institutions with effective oversight by leading experts from across the country.

PRAMUKHSWAMI MEDICAL COLLEGE

The Pramukhswami Medical College (PSMC) continued on its path of expansion. Both academic and non-academic activities during the year were geared up to accommodate the 50 additional seats in the MBBS curriculum, as granted to the college by the Oversight Committee created on the orders of the Supreme Court.

Accordingly, the first batch of 150 students (which included the additional 50 seats) was admitted to the 2016-17 academic session.

Funds are being raised for adding all the facilities required for the additional 50 seats in the Undergraduate course. Work is progressing fast for completing the major building projects on time. Most of the museums and labs in the college have been renovated. A separate Knowledge Centre is getting built – which is much more than a conventional library for students, considering the space that is available and, more importantly, the host of facilities it provides in fulfilling the requirements related to medical literature and studies. Work on the Assessment Centre is also proceeding at a brisk pace.

A separate wing to accommodate more beds in the Hospital is also in the final stage of completion.

Events

Some of the important events organised during the year were:

The H M Patel Memorial Lecture is held every

Regular group discussions help undergraduate students to improve their overall performance.

year on 30th November to commemorate the death anniversary of our Founder Chairman Dr. H.M. Patel. The 12th lecture was delivered by Dr. M.R. Rajagopal, Chairman of Pallium India and Director of the WHO Collaborating Centre for Training and Policy on Access to Pain Relief, on the topic, 'Patient-Centred Care in Healthcare'.

World Hospice and Palliative Care Day was celebrated on 19th October 2016, to raise awareness of the concept of palliative care among students and faculty. The theme for the celebration was, 'Living and Dying in Pain: It Doesn't Have to Happen'.

The college observed World Bioethics Day on 19th October 2016. The theme this year was 'Human Dignity and Human Rights', with debates, and poster and essay competitions forming part of the event.

The college organised a National Conference on Health Professions Education 2016 under the aegis of the Academy of Health Professions Education (AHPE), supported by the Foundation of Advancement of International Medical Education Research (FAIMER), during 23rd - 26th November 2016. There were Indian and foreign participants from varied disciplines.

World Diabetes Day was celebrated on 18th November 2016 with all the institutions of the Mandal participating. Poster competitions and extempore talks on the subject were organised.

Strategic Groups

Education at Pramukhswami Medical College has been governed by various strategic groups comprising senior faculty members, whose goal is to bring about improvements in all the various facets of medical education that affect the overall performance of students.

Following are highlights of the activities taken up and developments registered through each group:

Curriculum Design and Implementation Group

The group constantly monitors and amends the curriculum for the MBBS course that is deemed essential for updating students' knowledge and is instrumental in making them more competent medical professionals.

Students celebrate Yoga Day. They are encouraged to engage in extra-curricular activities.

- Activities related to Undergraduate curriculum, initiated in 2015-2016 continued. The major focus remained on teaching of core areas in each of the system modules.
- The method of conducting the modules was modified after taking a verbal feedback from students and faculty.
- The integrated system of teaching for first and second year MBBS is being undertaken to the maximum possible level.
- In the IIIrd MBBS, Part 1 & 2 integrated modules were conducted.
- Orientation programmes for all MBBS batches focused on sensitizing students to the need to develop soft skills to become better healthcare professionals.

Assessment Group

The group works at bringing about effective methods of assessment that evaluates the core facets of a student's calibre as a medical professional. The following significant steps were taken up during the year:

- The assessment methods for MBBS I, II and III were standardized after discussions with various departments on how to improve the conventional system.
- The evaluation components for assessment were also standardized. This entails assessing the students pragmatically on the basis of parameters that carry weightage to gauge their core potential as medical professionals.
- The group also proposed and brought about changes in the assessment patterns of the University examination of medical students.

This meant that exams would be focused on assessing the knowledge of students on the basis of relevant practical facets.

- The group is now contemplating introducing these evaluation practices at the PG level as well.

Student Support Group

The Student Support Group's (SSG) guiding philosophy is to facilitate extra-curricular development of students and help them develop, together with the alumni, as brand ambassadors of the institution. During the year the group carried out the following activities:

SPU Inter-College Sports Tournaments 2016

- The PSMC Girls Badminton Team won the Champion's trophy at the SPU Inter-College Badminton Tournament played at the SPU Sports Complex on 31st July 2016. The team won the title for the third consecutive year.
- The PSMC Girls also won the Champion's trophy at the SPU Inter-College Basketball Tournament, organised from 1st to 3rd September 2016.
- The PSMC Boys Team won the second place at the SPU Inter-College Chess Tournament, on 27th July 2016.

Other Sports Tournaments

PSMC organised basketball and volleyball tournaments for the first time. The College started a H.M. Patel Basketball Tournament this year in memory of late Dr. Karan Bhatnagar, a student who suffered a fatal road accident. While 11 teams participated in the basketball tournament held in April, eight teams participated in the volleyball event in May. In the State-level 'H.M. Patel Night Football Tournament' organised successfully by PSMC students, of the eight teams participating, the PSMC team secured the first position.

A cricket tournament, in which 18 teams participated, was also organised during the year.

Generosity Volunteer Activities

PSMC Serves: This is an initiative by PSMC students in memory of late Dr. Karan Bhatnagar, a student from the 2010 batch. As a part of this movement, students tied up with an NGO called 'Bachpan' that works for less privileged children of our district to conduct a medical camp on 18th

June 2016 in the slum area of Bakrol.

'Aushadhi', the drug bank was re-initiated by students with the purpose of providing medicines free of cost to poor patients coming to the Hospital. Initially indoor patients are being served, later, outpatients will also be included.

Blood Donation Camp: A blood donation camp was organised in collaboration with the Blood Bank at the Hospital.

Medical Camp on Doctors' Day: Two medical camps were organised on Doctors' Day, one at Vallabh Vidyanagar covering four Anganwadis in slum areas. Of around 150 children, 40 were treated on OPD basis and 22 were referred to Shree Krishna Hospital (SKH) for further investigations and treatment. The second one, also a regular health check-up camp, was conducted at Panchvati School, Karamsad. The team checked around 130 school children of who 50 were treated on OPD basis and 10 were referred for further investigations and treatment to SKH.

Mentorship Programme: The Mentorship Programme for the 2014 batch students was offered

The 720-bed teaching hospital provides students with practical training on an ongoing basis.

for the second year in February 2016. Students selected their mentors voluntarily. Around 25-30 faculty and staff members offered to be mentors.

Celebration of International Yoga Day: International Yoga Day was celebrated in collaboration with the College of Physiotherapy and Nursing School, on 21st June 2016. 150 students and 20 faculty members participated.

Yoga Shibir: PSMC arranged a Yoga Shibir for the 2013 batch students at the Activity Centre, on 1st and 2nd September 2016. Director of Lakulish Yoga University Dr. R.J. Jadeja was the key resource person, accompanied by yoga expert Dr. Bhanubhai Pandya. Practical sessions were conducted in the morning and theory in the evening.

Cultural & Social Activities

Horizon-2016: Horizon is the annual socio-cultural festival for Pramukhswami Medical College students. The theme for this year was, 'Adolescence: Shaping the Youth'. The event was organised from 13th to 15th October 2016.

Theme-based events included a health camp and a street play in Ghunteli village. An adolescent health model-based awareness workshop

was also conducted in a local school in Karamsad. Here too, a street play with about 200 students was held.

Adolescent Health Workshops for School Students: This year PSMC students conducted two half-day workshops on adolescent health, under the guidance of the Department of Community Medicine. 90 boy and 100 girl students from Stds. IXth, Xth and XIth participated. This is perhaps the first occasion in Gujarat and may be in India when medical students themselves conducted a workshop for school students.

Professional Development Group

The requests for Continuing Professional Development (CPD) activities increased this year by almost 17% compared to the previous year, with around 50% increase in participation of junior teachers and 90% increase in participation of sub-specialists. Of the 535 requests for participation in national, international conferences, and study leave, 113 received financial support from Charutar Arogya Mandal.

Presentations at national and international conferences by faculty from our Centre have increased marginally (12%), but participation at international events has increased by 35% compared to the previous year.

Participation of faculty from our Centre as invited speakers, resource persons and experts also increased by 50%, and as chairperson increased by 100%.

PSMC - Medical Council of India Nodal Centre

During the year, the Pramukhswami Medical College - Medical Council of India (MCI) Nodal Centre for Faculty Development conducted four Revised Basic Course Workshops which were attended by 104 faculty members from various medical colleges. Seventy one medical faculty members participated at the three Revised Basic Course Workshops at designated colleges. Our Nodal Centre's Resource faculty was also nominated as MCI Observers for the workshops organised at allocated medical colleges.

The Nodal Centre also conducted four Sensitization Workshops for the ATCOM Module Program which were attended by a 100 participants.

Dr. Praveen Singh, Professor & Head, Anatomy, was nominated as Member of the newly constituted Reconciliation Board of the Medical Council of India. As member, he will be extending his assistance to the Council in all academic matters.

H M PATEL INSTITUTE OF POSTGRADUATE STUDIES

The College was granted permission to offer MD in Forensic Medicine from academic year 2017-18 by the Ministry of Health and Family Welfare. The College plans to initiate the process for starting the following courses in the near future:

- MD Critical Care Medicine
- MD Radiotherapy
- DM Cardiology
- DM Neurology
- DM Oncology

As per the Gazette notification of the Ministry of Health & Family Welfare, admissions to Postgraduate courses from the academic year 2017-18 will be based on marks obtained in the All India PG NEET exam. The previous year, results of PG exams were 100%.

K M PATEL INSTITUTE OF PHYSIOTHERAPY

While the quality of clinical expertise is of paramount importance, the Institute has succeeded in nurturing professionals who are sensitive and compassionate, virtues essential to the profession of physiotherapy.

Activities here are broadly categorized into three aspects: Academics, Community Outreach and Student Liaison. Significant highlights of the year included:

Academics

The *Oath-taking Ceremony* was organised for the 13th outgoing interns' batch on 16th April 2016. All the students were conferred the course completion and internship completion certificates. Awards for the best project and seminar presentation were given away.

Orientation programmes were held for first year postgraduation students (Batch 2016-18) as well as I, II, III and IV year students and interns at different times during the year.

A *unique 11-day Crash Course*, with sessions on significant subjects, was introduced for PG students so as to refresh their knowledge, instil

a learning attitude and bring all the students on the same platform. At the end of it, their performance was evaluated through the Objective Structured Practical Examination (OSPE) method.

A *scientific talk* on 'Innovations in Physiotherapy' was delivered by Dr. Savitha Ravindran, Principal, College of Physiotherapy, MS Ramaiah Medical College, Bengaluru, on 26th December 2016.

Dr. Bharti Bellare, Professor, MGM College of Physiotherapy, Navi Mumbai, delivered a lecture on 'Anatomy of Abdominal Capsule and Its Integrated Functions'.

World Physiotherapy Day was celebrated on 8th September with a host of activities. A guidance seminar on 'Physiotherapy as a Career Option' was arranged in six schools of Anand, Vidy-anagar and Valasan. A free camp was organised where free fitness assessments, including body composition analysis and tailored exercise prescriptions were provided to nearly 70 joggers and walkers. Booths and posters to create awareness on the role of physiotherapy were arranged in the Hospital.

Students are trained to be sensitive and compassionate when dealing with patients, especially the elderly.

Community Services

Physiotherapy Camps: During the year, the Institute organised camps at Dahemi, Vasna (Borsad) and Bakrol villages for about 180 patients. Those requiring special medical advice were referred to Shree Krishna Hospital for further consultation. The camp beneficiaries were provided 50% concession coupons for seven consecutive treatment days at the Physiotherapy OPD.

NSS Special Shibir: The Institute got National Service Scheme unit for 100 students. As a part of this, a week-long special camping was arranged in Vasana village, Borsad taluka, from 27th November - 3rd December 2016, with health & hygiene awareness and each one teach one themes. Fifty students with three staff members in rotation stayed in the village for a week. Various medical camps for ophthalmology, gynaecology, cancer screening and ENT were organised during the week in which 217 patients participated. A physiotherapy camp was also organised throughout the week where a total of 209 patients with various conditions were treated. For those who could not attend, there was door to door physiotherapy awareness campaigning and treatment provided. Mahila Mandal groups were educated about breast and cervical cancers.

The K M Patel Institute of Physiotherapy runs specialized clinics for children with special needs.

Disability Day: Children of Deepa Academy disability school in Tarapore, were invited along with the patients of Physiotherapy OPD, to perform at a cultural programme organised on Disability Day on 3rd December.

Student Liaison

Physio Pulse – 2016, the annual socio-cultural event was celebrated (2nd to 8th April 2016) by combining the two themes adopted during the previous two years, 'Ability and Beyond Disability' and 'Each One Teach One'.

The week-long celebrations included a blind cricket tournament, a cultural programme by students from special schools of Tarapur and Gurukrupa, and a *Mahasuryanamaskar* by students and faculty. On the last day the best outgoing student was felicitated and awarded a gold medal. Awards for academic excellence were also given away.

Med-Olympics 2016: Students and staff participated in Med-Olympics and in the Khel Mahakumb organised in October 2016.

An inter-college sports event was organised by Sardar Patel University from 27th July to 4th August 2016. The Institute's girls team won the champions title in table tennis and the runners-up position in badminton.

G H PATEL SCHOOL AND COLLEGE OF NURSING

The College offers diploma and graduation certificates in Nursing. However, the philosophy governing both the courses remains the same – that is preparing professionals who will be sensitive and compassionate towards their rural counterparts while providing quality of care that is excellent. All the academic and non-academic activities have been woven together in such a way as to promote these very qualities in our nursing professionals.

Academics

- An Orientation programme for the first year GNM and BSc students was organised on 7th November 2016.
- The Candle-lighting and Oath-taking ceremony of the 37th batch of DGNM and 3rd batch of BSc Nursing was held on 17th February 2017.
- A Farewell function was held for final year Nursing students on 25th March 2017.

During the year, the faculty members and students participated in a number of Workshops, Training Programmes and Educational Tours. Notable among them were:

- First National Conference on 'Accelerate Coverage and Quality of KMC (Kangaroo Mother Care)', held at Hyderabad on 26th February 2017.
- Visit to the Sewage Treatment Plant at Ajwa and Water Purification Plant at Nimeta, on 10th March 2017.
- A national-level conference on 'Qualitative Research in Nursing', organised by Sumandeep College of Nursing, Vadodara, on 15th March 2017.

SMT. L P PATEL INSTITUTE OF MEDICAL LABORATORY TECHNOLOGY

The L.P. Patel Institute continues to offer various undergraduate courses in Clinical Laboratory Technology, Radiotherapy Technology, Imaging Technology, Respiratory Care Technology, and Operation Theatre & Anaesthesia Technology. Also postgraduate courses like Diploma in Medical Laboratory Technology, Cardiac Care Technology and Perfusion Technology for Masters degrees, and PhD courses in the field of Allied Health Science and Technology.

Increasing awareness of such courses among

Nurses, the backbone of the hospital, are provided intensive and rigorous training, both theoretical and practical.

- Six-weeks training (6th March to 15th April 2017) on 'Palliative Nursing', organised by the Trivandrum Institute of Palliative Care.

Research

The faculty and students of Nursing too started engaging in research. The humble yet firm beginning was with the following studies:

- Preparation of Nursing Students towards their Learning Consignments and their Practical Academic Stress: *Shany Thomas, Raksha Parmar, Anna D Rao.*
- A study to assess the effectiveness of a planned teaching programme on knowledge regarding Palliative Care among staff nurses at Shree Krishna Hospital, Karamsad: *Shany Thomas, Nancy, Shainy, Yamini, Janki, Riddhi Shah, Avrutti.*

Research A Major Thrust Area

Right from the start, Charutar Arogya Mandal identified Research as a thrust area. In 2009, the Mandal set up the Central Research Services (CRS) to generate greater awareness and support for research-related activities.

CRS conducts regular research as also scientific writing workshops for students and faculty. Overall, CRS focuses on three areas: Teaching or orientating people, including students, in research methods and biostatistics, epidemiological research, and community-oriented primary care. Since the CRS was established, the Department has seen a quantum jump in the number of PubMed-Indexed publications.

CRS Group

The CRS Group invited new participants in the group which contributed in adequately managing the flow of activities. The new participants include a student representative for the first time – indicating the growing enthusiasm of medicine students in research.

The Central Research Services enabled presentations and publications by many faculty members of the institution. This year we published more than 50 PubMed-Indexed papers – the highest across medical colleges in Gujarat. For the third consecutive year, Pramukhswami Medical College leads in Gujarat in the number of research papers published.

More than six undergraduates were authors of publications in PubMed-Indexed journals this year – probably the highest participation of undergraduates across India. Over the last three years, 19 publications have been submitted by

undergraduates. Three undergraduates presented their work at the prestigious Paediatric Academic Societies at Baltimore, Maryland, US, in May 2016, and more than 15 undergraduates presented their work at the European Academy of Paediatric Societies in Geneva in October 2016.

The Central Research Service group also conducted regular research workshops and scientific writing workshops for students and faculty. It has also begun using STATA as the primary software for analysis of data.

CRS also collaborates with organisations of international repute like Johns Hopkins University, Boston University, and others such as Indian Immunologicals Ltd, to strengthen public health and extension programmes and provide simple, feasible solutions to complex health problems. Recently an industry-funded Nutritional Clinical Trial was developed and conducted entirely by

Research for Better Patient Care

An in-house study taken up at the Shree Krishna Hospital resulted in introduction of a practice that benefits patients as well as the Hospital by saving on both treatment costs and treatment time – both of which are vital components for efficient patient care.

Role of Short Term Video Encephalography with Induction by Verbal Suggestion (STVEEG) in Diagnosis of Suspected Paroxysmal Nonepileptic Seizure-like Symptoms – a study carried out by Soaham Dilip Desai, Devangi Desai, and Trilok Jani

The study concluded that STVEEG is an effective method to diagnose the cause of transient unresponsiveness in patients. The method involves giving verbal suggestions to a patient to recollect the episode of unresponsiveness while an EEG [record of brain waves] as well as a video recording is done. Observation of the patient's video and the brain waves in the EEG during the induced episode can differentiate the reasons of the "spells" of unresponsiveness, especially to differentiate a seizure disorder from a "non-epileptic" episode [pseudo-seizure]. Differentiating between the two conditions is extremely important as the treatments for the two are entirely different.

The new practice, based on this research, makes diagnosing possible on outpatient basis, thus avoiding lengthy admission and extended monitoring, and saving at least Rs. 25,000-Rs. 30,000 for each patient.

our own investigators.

Research that has been conducted in Karamsad is used by international guideline agencies such as Cochrane to create guidelines.

UMASS-CAM Research Partnership

The UMASS-CAM partnership has been renewed in 2016 for another three years. In April 2016, the partnership was awarded First Prize at the Universities of Global Health Conference in San Francisco for being a first-class model for academic partnerships. The award was received by Dr. Nisha Fahey and Mr. Apurv Soni of UMASS who presented the paper and are founders of this partnership, along with Dr. Somashekhar Nimbalkar (CAM) and Dr. Jeroan Allison (UMASS).

Under the partnership, we have had a new Surgical Research Scholar, Dr. Maunil Bhatt from UMASS, join us for two years to work on the trauma registry. His efforts along with Dr. Kartik Vishwanathan's ensured that we were selected for the National Task Force on Trauma for research on road traffic accidents. Pramukhswami Medical College is one of the five centres across India that is part of this prestigious project. Others include King George Medical College, Lucknow; M S Ramaiah Medical College, Bengaluru; Government Medical College, Thrissur; and All India Institute of Medical Sciences, New Delhi. Apart from this, two other research projects are being carried out, namely the Atrial Fibrillation Screening using mobile phones, and the DeWorm Project on hookworm infection in the community.

Cardiologist Dr. Sunil Karna and Microbiologist Dr. Suman Singh are leading these projects in India. Besides these, regular neurology teaching seminars are conducted between UMASS and CAM by Neurologist Dr. Soaham Shah.

Over the past year we had multiple visits by UMASS faculty members including the Associate Dean for Undergraduate Medical Education, Dr. Melissa Fisher; Professor and Vice Chair, Department of Quantitative Health Sciences, Dr. Jeroan Allison; Professor Litwin, Head of Surgical Department; Dr. Heena Santry, Head of Surgical Research; Dr. Payal Modi, Assistant Professor of Emergency Medicine; Dr. Patricia Mcquillkin, Clinical Associate Professor of Pediatrics; Dr. Christina Fitch, Palliative Care Specialist; and many other fellows and students. These interactions have encouraged and produced new ideas and helped the clinical and research process at CAM.

The European Academy of Paediatrics holds its conference every two years and is the most prestigious conference in the European continent, attracting faculty and delegates from across the world. We had 27 presentations at this conference – the highest number from India – and with the highest number of undergraduates presenting their research. The presentations were appreciated by conference delegates.

We had seven oral presentations at the conference and some of the work has already been published.

RESEARCH PROJECTS – COMPLETED

1	A study on clinical profile and antimicrobial drug resistance in infection with <i>Stenotrophomonas maltophilia</i> at tertiary care hospital of rural Gujarat, India.	Dr. Yagnesh Pandya
2	Relationship among age, gender, anthropometric characteristics and dynamic balance in children age group between 5 to 12 years old at Anand district.	Dr. Nirav Vaghela
3	Qualitative assessment of learning strategies among medical students using Focus Group Discussion and in depth interviews.	Dr. Anuradha Joshi
4	Assessment of surgical skills of ophthalmic residents using surgical Rubric for Phacoemulsification and SICS.	Dr. Samir G Bhavsar
5	Risk Assessment and safety in trauma centre (Emergency Unit) in Shree Krishna Medical Hospital and Research Centre, Karamsad	Dr. Monica Gupta

RESEARCH PROJECTS – ONGOING

1	Knowledge of basic life support (BLS) among doctors and nursing staff of a rural based tertiary care hospital, Karamsad.	Dr. Madhavi Chaudhari
2	A study on non-venereal genital dermatoses in male patients at rural based tertiary health care centre.	Dr. Pragya Nair
3	An observation study comparing the effects of Alfuzosin, Tamsulosin and Silodosin in catheter free trials after acute urinary retention due to benign prostatic hyperplasia.	Dr. Sharadchandra Shah
4	To study seasonal pattern of hospitalization due to respiratory diseases in a rural hospital.	Dr. Ravish Kshatriya
5	Impact of nutritional supplementation on clinical outcome of chronic liver disease patients.	Dr. Jyoti Mannari

6	Assessment of surgical patient's perioperative anxiety at a tertiary care hospital.	Dr. Hemlata Kamat
7	The effects of mirror therapy on the gait of chronic stroke patients: A randomized controlled trial.	Dr. Daxa Mishra
8	Awareness about government policies amongst the family members and parents of children with cerebral palsy in Anand District.	Dr. Harihara Prakash
9	Prevalence of contraceptive use in couples having two children in work area of community medicine department, PSMC.	Dr. Tushar Patel
10	To identify the prevalence of various traditional risk factors in patients admitted with acute coronary syndrome in a tertiary care center of rural Gujarat.	Dr. Tushar Patel
11	To Assess whether a simple Indian Diabetes Risk Score could help screen Gujarati individuals at height risk of Non- Alcoholic fatty liver disease.	Dr. Alpa Leuva
12	To assess 'Test Anxiety' in medical and paramedical students.	Dr. Somashekhar Nimbalkar
13	Study of the effect of yoga nidra on mental wellness during immediate post-partum period.	Dr. Smruti Vaishnav
14	Challenges and barriers related to Informed consent process in health research.	Dr. Barna Ganguly
15	Introduction of objectively structured practical examination (OSPE) in pathology: A pilot study.	Dr. Keyuri Patel
16	To assess respiratory symptoms and lung functions in community of villages of Anand district.	Dr. Utkarsh Shah
17	Clinical Profile and outcome of obstetric patients admitted to the medical surgical intensive care unit.	Dr. Samir B Patel
18	An Evaluation and initial approach by bedside point of care (POC) ultrasonography to the adult patients with shock in tertiary care center.	Dr. Samir B Patel
19	Attitude & perception of general population about autopsy in India.	Dr. Sanjay K Gupta
20	Clinical health implications of heavy metal contamination in soil, water, plant, animal and human in an effluent industrial contaminated area.	Dr. Alpa Leuva
21	Dermatoscopic Evaluation of various stages of dermatitis- A clinico-dermatoscopic study.	Dr. Pragya Nair
22	To study the prevalence and risk factors of SSI in the patients of laparotomies admitted in the surgical wards.	Dr. Somashekhar Nimbalkar
23	Premenstrual syndrome in nurses	Dr. Somashekhar Nimbalkar
24	Smartphone Monitoring for Atrial Fibrillation in Real-Time-India (SMART India).	Dr. Sunil Thanvi
25	Assessment of change in road safety behaviors (Helmet Use) for Motorized Two-Wheelers: Impact of a Tragic Event on Behavior.	Dr. Somashekhar Nimbalkar
26	To assess user experience with Hospital Management Information System (Solace) in Shree Krishna Hospital (SKH), Karamsad.	Mr. Sandeep Desai
27	Determining worm occurrence, response to drugs, and microbiome influences among school-going children in Gujarat, India. (DeWORM-India).	Dr. Somashekhar Nimbalkar
28	Epidemiological correlates of well-being at work place and other occupational aspects (hazards, injuries, accidents and diseases) amongst saw mill workers in Anand, Gujarat	Dr. Deepak B Sharma

29	Awareness about human papilloma virus(HPV) vaccine among medical & paramedical female students of Shree Krishna hospital campus, Karamsad, India	Mr. Ajay Phatak
30	Prevalence of Kangaroo mother care in neonates post discharge	Dr. Vallaree Morgaonkar
31	D419LC00001: A Phase III randomized, open-label, multi-center, global study of MEDI4736 in combination with Tremelimumab versus standard of care in the treatment of first-line recurrent or Metastatic squamous cell head and neck cancer patients. Submission of study documents for review and approval	Dr. Nirav Asarawala
32	EFC11570(ODYSSEY CV): A Randomized, Double Blind, Placebo-Controlled, Parallel-Group Study to Evaluate the Effect of Alirocumab (SAR236553/REGN727) on the Occurrence of Cardiovascular Events in Patients who have Recently Experienced an Acute Coronary Syndrome. Patient Appointment card for ethics committee submission and approval.	Dr. Sunil Karna
33	CLCZ696B2317: A multicenter study to evaluate safety and tolerability in patients with chronic heart failure and reduced ejection fraction from PARADIGM-HF receiving open label LCZ696. Patients Card for ethics committee submission and approval.	Dr. Sunil Karna
34	AB07015: Prospective, multicenter, randomized, double-blinded, placebo-controlled, 2-parallel groups, Phase 3 study to compare the efficacy and the safety of Masitinib at 6mg/kg/day versus placebo in the treatment of patients with severe persistent asthma treated with oral corticosteroids. Submission of Protocol Amendment Version 12.0 and inform consent form Version 8.0 for above mentioned study. Submission of Protocol Amendment Version 11.0 for above mentioned study.	Dr. Ravish Kshatriya
35	D419AC00003: A phase III Randomized, Open-label, multi-centre, global study of MEDI4736 in combination with Tremelimumab therapy versus standard of care platinum based chemotherapy in first line treatment of patients with advanced or metastatic non-small-cell lung cancer(NSCLC) (NEPTUNE). Submission of study documents of ethics committee for review and approval.	Dr Pradeep Shah
36	Level of education shaping the attitude of students without disability towards people with disability	Dr. Harihara Prakash
37	Comparison of efficacy of three devices [foot operated resuscitator, T piece and bag valve mask] of manual positive pressure ventilation: a mannequin based study	Dr. Somashekhar Nimbalkar
38	Randomized Control Trial to compare Kangaroo Mother Care with oral sucrose for pain management in premature neonates on heel prick	Dr. Apurva Chapla
39	Retrospective analysis of safety and efficacy of concurrent chemo-radiotherapy with dual agent chemotherapy for carcinoma esophagus in resource limited setting	Dr. Nirav Asarawala
40	Study of clinical profile and outcome of patients with snake bite	Dr. Samir B Patel
41	A study of association between hypertensive retinopathy, microalbuminuria and coronary artery disease	Dr. Himanshu V Pandya
42	Effect of music therapy on physical and psychological parameters in perioperative state in patients of obstetrics and gynecology	Dr. Smruti Vaishnav

43	Evaluation of cognitive style and spiritual quotient of postgraduate students of HM Patel Centre for Medical Care and Education	Dr. Bhalendu Vaishnav
44	To study the incidence of peripheral retinal degeneration in interns	Dr. Devendra Saxena
45	To study the effect of glycemic control on refractive status in diabetes mellitus patients	Dr. Devendra Saxena
46	Correlation of body mass index with bed side clinical tests and Cormack-Lehane Grading for prediction of difficult laryngoscopy and intubation in a rural tertiary health care setup	Dr. Hemlata Kamat
47	Histopathological and morphological study of lung tumors	Dr. Keyuri Patel
48	Role of serum albumin in preoperatively determining post op morbidity and mortality and its efficacy against pre op ASA Grade and hematocrit as risk predictors	Dr. Shirish Srivastava
49	A correlational study between prostate specific antigen and prostate volume with disease severity in patients of benign prostatic hyperplasia	Dr. Jitesh Desai
50	1160.186: A prospective randomized, open label, blinded endpoint [PROBE] study to evaluate dual anti thrombotic therapy with Dabigatran Etexilate (110mg and 150mg bid) plus clopidogrel or Ticagrelor vs. Triple therapy strategy with warfarin (INR 2.0-3.0) plus clopidogrel or Ticagrelor and aspirin in patient with non-valvular atrial fibrillation (NVAF) that have undergone a percutaneous coronary intervention (PCI) with stenting [RE-DUAL PCI]	Dr. Sunil Karna
51	EFC11570(ODYSSEY CV): A randomized, double blind, placebo-controlled, parallel-group study to evaluate the effect of Alirocumab [SAR236553/REGN727] on the Occurrence of Cardiovascular Events in Patients Who have recently Experienced an acute coronary syndrome	Dr. Sunil Karna
52	An association between hyperlipidemia and diabetic retinopathy and its psychosocial impact on diabetic retinopathy patients-An observational study	Dr. Chaitali Patel
53	Assessing the impact of treatment on quality of life in patients of acne vulgaris	Dr. Upama Trivedi
54	Assessment of toxicity and tolerability of IMRT/ VMAT based chemoradiation in patients with carcinoma cervix at a rural based community cancer centre at Shree Krishna Hospital, Karamsad	Dr. Nirav Asarawala
55	To Study the prevalence of primary open angle and primary angle closure glaucoma at tertiary care health center- Shree Krishna Hospital in the population of Anand district in Gujarat	Dr. Harsha Jani
56	To monitor progression of visual field changes in glaucoma patients using global indices of Octopus Perimetry at a tertiary health care centre	Dr. Samir Bhavsar
57	Utilization study of hormones and their antagonists in treatment of patients of breast and prostate cancer and their effect on quality of life	Dr. Barna Ganguly
58	Compliance to antibiotic Therapy at Pediatric Out Patient Clinic	Dr. Dipen Vasudev Patel
59	To study the effects, profile and outcome of patients put on Humidified high flow nasal cannula (HHFNC) (Optiflow system through AIRVO-2) at PICU of Shree Krishna Hospital	Dr. Krutika Tandon
60	Platelet parameters in stroke patients	Dr Sanjay Chaudhari
61	Thyroid Dysfunction following management of Non-Thyroid Head and Neck Cancer	Dr Yojana Sharma
62	A Study on human brucellosis in hospital and community of rural Gujarat	Dr Suman P Singh

63	Risk factors for ventilator associated pneumonia in patients with trauma and head injury in a tertiary care teaching hospital of rural Gujarat	Dr Suman Singh
64	A Comparative study of clinic-pathological profile of oral squamous cell carcinoma with submucous fibrosis and oral squamous cell carcinoma without submucous fibrosis	Dr Girish Mishra
65	Correlation of Serum uric acid levels in diabetic patients	Dr Simbita A Marwah
66	Awareness and attitudes towards Prosthodontic Rehabilitations among rural population in Anand District, Gujarat, India	Dr Hardik Prajapati
67	Comparison of post-operative pain relief after minimal invasive cardiac surgery (mics) vs conventional valve surgery	Dr Gurpeet Kaur
68	Assessment of Dental Anxiety in Medical Students undergoing clinical posting in Dental Surgery of Pramukhswami Medical College, Karamsad - An interventional Study	Dr Swati Sathaye
69	Perception of nursing students towards learning environment and their perceived academic stress.	Ms. Shany S Sarate
70	An Analysis of Deferral Pattern in Platelet pheresis donors at ADGBB Shree Krishna Hospital, Karamsad	Dr Kirti Rathod
71	A Study of Vancomycin and Daptomycin MIC in clinical isolates of Staphylococcus aureus at a tertiary care hospital of Gujarat	Dr Chirag Modi
72	Etiological Agents and Pattern of Antimicrobial drug Resistance with Blood Stream Infections in a Tertiary Care Teaching Hospital or Rural Gujarat	Dr Yagnesh G. Pandya
73	Correlation of serology with histology based detection of Helicobacter Pylori infection in a tertiary care teaching hospital, Gujarat	Dr Mudita Paliwal
74	Study of Health Related Quality of Life in Obese and Overweight Patients	Dr Jyoti Mannari
75	To Study the Effect of Group Exercises in Patients with Parkinson's Disease : Case Series Study	Dr. Harihara Prakash
76	The effect of aerobic exercise on total and visceral adiposity in Healthy obese adult	Dr Shweta Parikh
77	To Compare the Effects of Aerobic Exercise and Yoga on Primary Dysmenorrhea	Dr Nirav Vaghela
78	Effects of Scapular PNF Exercises in Adhesive Capsulitis	Dr Ashish V Gupta
79	Histopathology- immunohistochemistry correlation in Histopathology	Dr Keyuri Patel
80	To Assess the diagnostic accuracy of CT pulmonary angiography- 128 sliced in the detection of pulmonary embolism in clinical (well's score) and /or biochemical (D-DIMER value) suspiciousness	Dr Jaydeep Doshi
81	A study on dermatoses in menopausal patients at rural based tertiary health care centre	Dr Pragya Nair
82	Analysis of timeliness in different phases of biochemistry samples	Dr. Mitul Chhatrivala
83	Effectiveness of supervised and home based physiotherapy intervention in patients with chronic obstructive pulmonary disease (COPD)	Dr. Daxa Mishra
84	Study of coping ability to external demands while walking in geriatric population	Dr. Vidhi Gajjar

95	EFC11570 (ODYSSEY CV): A Randomized, Double-Blind, Placebo-Controlled, Parallel- Group Study to Evaluate the Effect of Alirocumab (SAR236553/REGN727) on the Occurrence of Cardiovascular Events in Patients Who Have Recently Experienced an Acute Coronary Syndrome. Patient Retention Brochure for Ethics Committee Submission and Approval	Dr. Sunil Karna
96	1160.186 [RE DUAL PCI]: A prospective randomized, open label, blinded endpoint (PROBE)study to evaluate dual anti thrombotic therapy with Dabigatran Etexilate (110mg and150mg bid) plus clopidogrel or Ticagrelor vs. Triple therapy strategy with warfarin (INR 2.0-3.0)plus clopidogrel or Ticagrelor and aspirin in patient with non-valvular atrial fibrillation (NVAf)that have undergone a percutaneous coronary intervention (PCI) with stenting Protocol 1160.186 (RE-DUAL PCI) for Ethics Committee Review and Approval	Dr. Sunil Karna
97	Assessment of the impact of disability on Quality of Life and Coping in patients suffering from Allergic Rhinosinusitis	Dr. Himanshu Sharma
98	Awareness and misuse amongst Patients, Pharmacists and Medical Practitioners	Dr. Pragya Nair
99	Prediction of oesophageal Varices by a non-Invasive Method in Patients who are having cirrhosis	Dr. Himanshu Pandya

Community Extension

Taking Medical Care to the Hinterland

Taking quality medical care beyond the walls of the hospital campus to the community at large, to areas where it has not reached before, is one of Charutar Arogya Mandal's four thrust areas. The Mandal's Community Extension strategy is to ensure better health standards for more and more patients in the hinterland, in particular for those economically disadvantaged. Such health programmes cover a range of afflictions and diseases – right from complex ones like cancer to more prevalent diseases like hypertension and diabetes.

The Mandal's Public Health Initiatives Group is tasked with planning, organising and reviewing health projects at the grassroots level.

While Extension Centres in remote areas are designed to make healthcare accessible to all, various social outreach programmes have been launched to spread awareness on health concerns.

The Cancer Prevention and Care Programme

The Cancer Prevention and Care Programme, supported by the Tata Trusts, has been extended by four months. It reaches out to more than 90 villages and involves:

Raising Awareness

To make the students as also the general community aware of cancer, a number of steps were taken including:

- 50 training sessions were conducted for 652 peers and 52 Sakhi Mandals.
- Tobacco consumption is a major cause of cancer. To prevent school-going children from developing the habit of tobacco consumption, informational DVDs on tobacco control and tobacco-free zone posters were distributed in all the 1,032 Government primary schools of

The Village Health Worker provides the vital link between patients in the villages and the Shree Krishna Hospital.

Six Papers Presented at the World Cancer Congress

The World Cancer Congress (WCC) is acknowledged by the global cancer community as the leading international event in the field of cancer treatment. Of the total 688 research abstracts, we presented six papers on the basis of various community-level programmes implemented by us. This was the highest number of entries from a single organisation in India.

Anand district through BRC (Block Resource Coordinators) and CRC (Cluster Resource Coordinators).

- A two-day workshop was conducted for NGO Kaira Social Service Society's field workers.
- 91 sessions of training on menstrual hygiene were held for adolescent girls in the district's primary and secondary government schools.

Detecting Cancer at an Early Stage

A total of 646 camps were held in the 90 villages over the last three years, where 583 patients were screened and 51 patients identified as cancer positive. Among these, 20 have completed their treatment to date.

Palliative Care

With an aim to make the quality of life better and pain-free for patients with terminal illness like cancer, kidney conditions, liver ailments and geriatric conditions, an OPD was set up at Shree Krishna Hospital with support from Pallium India. The OPD team is headed by an expert in pain-handling and includes a doctor specially trained in administering palliative care, a nurse and a paramedic staff.

Apart from treating patients at OPD level, the team also pays home visits when the patient is not in a condition to come to the Hospital for treatment. The medicines too are delivered at home when required. During the year, a total of 811 patients were treated on outpatient basis and 68 home visits were made.

SPARSH

(Shree Krishna Hospital Programme for Advancement of Rural and Social Health)

SPARSH is the latest initiative in Community Extension – a unique five-year home care Non-Communicable Disease (NCD) Care Model. It aims to strengthen a three-tier healthcare system by connecting virtually at all tiers through android

The Sevaliya Secondary Healthcare Centre has emerged as the most dependable healthcare facility in the region.

application and is operational in 90 villages across three districts (Anand, Kheda and Panchmahal). It is jointly sponsored by GMM Pfaudler in 60 villages and Shamdasani Foundation in 30 villages.

Through the programme, non-communicable conditions like hypertension, diabetes, cardiovascular diseases, and others are addressed at the community level. It provides early screening and treatment at the doorstep, thus reducing the burden of complications caused by these chronic diseases.

Till date 627 camps have been organised in 90 villages and 17,906 patients have been screened.

Of these, 420 patients were positively diagnosed for NCDs. About 597 patients have enrolled for home care at their doorstep. To ensure there are no man-made mistakes in handling of significant information related to the patient's health, the Village Health Workers (VHWs) are trained to use tablets with android application for further monitoring of diabetes and hypertension.

Extension Centres

The five extension centres and a secondary care centre strengthen the Mandal's vision of a three-tier model of comprehensive healthcare. During the year, 56,997 patients were treated on outdoor basis at the five extension centres. Some noteworthy events were:

- On completion of 25 years, a multi-speciality camp was organised at Bhadrans Arogya Trust which was attended by nearly 600 patients.
- International Women's Day was celebrated at the Anand Agriculture University Centre where orientation sessions for students were organised on 'Nutrition and Stress – Sources and Mechanisms to Deal'. Nearly 400 students and staff members participated, all of whom are undergoing an SRQ (Self-Report Questionnaire screening test, a tool to screen depression, anxiety and somatoform disorders) in phases. Those displaying positive results are

referred to Shree Krishna Hospital for consultation with a psychiatrist or psychologist.

Sevaliya Secondary Health Centre

Sevaliya Centre took significant strides in establishing itself as a dependable secondary care facility for the region. Ortho surgeries started at the Centre with the Orthopaedic consultants from Shree Krishna Hospital visiting twice in a week and a private consultant once a week. Surgeries related to severe fractures are conducted on a regular basis. With the addition of a full-time gynaecologist, all medical services are now available.

The Trauma Centre manages casualties of varied nature with dedication. A mass casualty owing to a road traffic accident was managed efficiently at the Centre despite the limited infrastructure and manpower, saving many lives. During the year 15,287 patients were seen on outdoor basis, 631 patients on indoor basis, 590 casualties were managed and 60 surgeries were conducted.

Extending the affordable care wing of Shree Krishna Hospital, the Jan Arogya Yojana was introduced at the Centre in addition to the services that are provided through the RSBY (Rashtriya Swasthya Bima Yojana) scheme.

A blood donation camp was organised in col-

Needy patients from villages are assured of quality treatment at the Sevaliya Centre.

laboration with BHEL (Bharat Heavy Electricals Ltd) and 97 units of blood were collected from the employees.

A CME (continuing medical education) on 'Common Mental Disorders' and 'Management of Vaginal Discharge' was conducted at the Centre with 42 General Practitioners from nearby areas participating.

Studies

The Community Extension Group has been conducting community-based studies which help in establishing useful learnings for the future and a foundation for advocacy. Following are the findings from research studies completed as also new initiatives taken up:

Burden of Injuries: The study measured the burden of injuries in villages of Gujarat over the year. A total of 492 injury cases were identified contributing to an incidence of 395 injuries per 100,000 per year. It was found that the most common causes of injury were road traffic accidents (RTA), falls and animal bites. The lower extremity, upper extremity, and head were the body parts most often injured in accidents, with fractures, bleeding, and traumatic brain injury being the most common pattern of injuries.

Atrial Fibrillation (AFIB) Study: With help of a mobile app and deployment of two field teams of VHWs, the heart rates of people in the community were randomly assessed. The study was conducted in 60 villages and the heartbeats of 200 people recorded for three days. The results were analysed by the project doctors and those having abnormal recordings were brought to the cardiac centre of Shree Krishna Hospital for free consultation with a cardiologist.

Deworming: A study was conducted in 10 villages of Sevaliya region to know the prevalence of worm infestation in children of age 5 to 15 years. The VHWs have to collect stool samples of 300 children which would be sent for further investigation in laboratories.

Anaemia in School Children: The study aims to study the prevalence and burden of anaemia in school children of Anand district and efficacy of the government's Anaemia Eradication Program. Till date, nearly 3,000 students from various schools have had their haemoglobin levels tested and the results are being assessed. The programme intends to educate and raise awareness about the prevalence of the condition and take up motivation programmes of peers for remedial action.

Students are posted to villages regularly to sensitize them to conditions in rural areas.

CSR and Fund Raising

The Fund Raising Group serves as a link between donors and patients to ensure that no patient goes untreated due to lack of ability to bear the treatment costs. It prepares, submits and follows up proposals related to CSR (Corporate Social Responsibility) and patient support, and documents and shares regular feedback with donors. But for the generous support of numerous donors, it would not be possible for us to reach out to so many patients from poor and underprivileged families.

The Mandal is proud to have been accredited for transparency and credibility by Guide Star India, Credibility Alliance, BSE Samman, empanelled with TISS National CSR Hub and as Implementing Agency at the Indian Institute of Corporate Affairs (IICA).

The Mandal received support in two ways: Patient Treatment Support and Support through CSR Initiatives.

Patient Treatment Support

Patient Treatment Support from generous donors came in various ways:

- A Charity Show with live performance by the renowned singer Sunidhi Chauhan organised on 7th January 2017 was attended by 5,500 supporters who helped raise Rs. 150 lakh for treatment of needy patients.
- Through coordination with Sir Ratan Tata Trust, Navajbai Tata Trust, Jamshedji Tata Trust, Sir Dorabji Tata Trust, Sarvajanik Seva Trust, Jalaram Trust and Infosys Foundation, Mumbai, an amount of Rs. 95.67 lakh was received for treatment of indigent patients.
- Through online donations received on the Mandal portal, as well as credible online platforms like Give India, i-Charity, HelpYourNGO where donors can contribute amounts ranging from Rs. 250 to Rs. 15,000 towards treatment of indigent patients on a monthly or one-time basis. Donations amounting to nearly Rs. 42 lakh for needy patients were received through GiveIndia.
- In response to 60 appeals placed in various publications on behalf of needy patients, donations from generous contributors totalled to Rs. 51.5 lakh.
- *Samaritans*, the bi-annual magazine which serves as a communication medium for networking with donors, was published in June 2016 and March 2017 and shared with donors.

Support through CSR Initiatives

Major CSR Partners include,

- Atul Limited

- Bajaj Group Foundations
- Desai Brothers Limited
- GMM Pfadler Limited
- Infosys Foundation
- Inox Air Products Pvt Limited
- Koch Chemical Technology Group India Pvt Ltd
- Larsen and Toubro Ltd
- Nesco Limited
- PBM Polytex Limited
- Pratham Group
- Sofotel Infra Pvt Ltd
- Tata Trusts
- Yes Bank Limited

The CSR projects fall under two broad categories:

1. Funding of major projects by donors to facilitate the much-needed expansion of the Hospital, Critical Care Units, and setting up of a Knowledge Centre at the Hospital so as to provide for the increased intake of undergraduate students from 100 to 150.
2. Supporting grassroots-based activities to promote preventive healthcare in which the Mandal institutions are involved, as specified under Schedule VII of the Companies Act, 2013, with the following ongoing projects:
 - SPARSH – a programme providing health services to village communities which aims at creating an integrated and robust 3-tier healthcare delivery system consisting of primary, secondary and tertiary levels;
 - A specially-designed programme, SPARSH-NIDAAN, for early detection of cancer among the rural community;
 - Enabling medical treatment at the Shree Krishna Hospital for vulnerable groups such as

An audience of more than 5,500 attended renowned singer Sunidhi Chauhan's performance – a Charity Show which helped raise Rs. 150 lakh for treatment of needy patients.

women, children and members from economically-disadvantaged sections of the community, so as to create gender equality and reduce inequalities faced by socially and economically-backward groups. The programmes cover:

- Enabling free stay to patients in general wards of the Hospital to make treatment more affordable;
- Free and or/substantially free treatment of women and children from Below-the-Poverty-Line (BPL) and other economically-disadvantaged families and highly-subsidised treatment for men from such families;
- Providing subsidised treatment to underprivileged patients suffering from cancer and cardiac ailments.

Impact of CSR Activities

By the end of the year, the following outcomes were observed as a result of these projects:

- SPARSH is being implemented in 90 villages of Anand, Kheda and Panchmahal districts of

Gujarat reaching out to about 2.5 lakh persons through a team of 90 Village Health Workers, 540 camps by three mobile health teams which treated 18,900 patients and around 1,000 Hypertension and Diabetic patients through home care. For 60 of these project villages, M/s GMM Pfadler provided Rs. 27.56 lakh under CSR to enable the social outreach, while the Shamdasani Foundation contributed Rs.10 lakh for the purpose.

- Over 3.24 lakh patients benefitted during the year from medical consultation without any charge at Shree Krishna Hospital's general out-patient services.
- Over 6,000 patients from BPL families and about 22,000 patients from economically-disadvantaged families benefitted from treatment estimated at Rs. 910 lakh at the Hospital's wards and ICUs.
- About 150 patients suffering from Cancer and Cardiac diseases were successfully treated at a highly subsidised cost.

Independent Auditors' Report to the Members of Charutar Arogya Mandal

Report on the Financial Statements

We have audited the accompanying financial statements of Charutar Arogya Mandal ("The Trust"), which comprise the Balance Sheet as at 31st March, 2017, the Statement of Income and Expenditure, Cash Flow Statement for the year then ended and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

The Trust's Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Trust in accordance with the Accounting Standards, as applicable to the Trust and in accordance with the accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Bombay Public Charitable Trust Act, 1950 for safeguarding the assets of the Trust and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Trust's preparation and fair presentation of the financial statements in order to design audit

procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Basis of Qualified Opinion

The amount of Gratuity and Leave Encashment payable as on 31st March 2017, as computed by the Actuary, aggregate to Rs. 3,109.03 lakhs (Rs. 2,441.49 lakhs as at 31st March 2016) against which a provision of Rs. 1,000.58 lakhs (Rs. 1,000.58 lakhs as at 31st March 2016) has been made and for the balance amount of Rs. 2,108.45 lakhs (Rs.1,440.91 lakhs as at 31st March 2016) no provision has been made in the books of account. This is not in compliance with the applicable provisions of Accounting Standard 15 'Employee Benefits'.

Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matter described in the Basis for Qualified Opinion paragraph, the aforesaid financial statements give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Trust as at 31st March, 2017; and its excess of expenditure over income and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

As required by The Bombay Public Charitable Trust Act, 1950 applicable to the State of Gujarat and on the basis of such checks as we considered necessary and appropriate and according to information and explanations given to us during the course of audit, we enclose in the Annexure, a statement on the matters specified therein.

Annexure to the Auditors' Report

(Referred to under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

- a) The accounts are maintained regularly and in accordance with the provisions of the Bombay Public Charitable Trust Act, 1950 and the Rules thereunder.
- b) The receipts and disbursements are properly shown in the accounts.
- c) The cash balance and vouchers in the custody of the Accountant on the date of audit were in agreement with the accounts.
- d) All the books, deeds, accounts, vouchers and other documents of records required by us, were produced before us.
- e) A register of movable and immovable properties is maintained.
- f) The Senior General Manager (Accounts) appeared before us and furnished the necessary information required by us.
- g) No property or funds of the Trust were applied for any object or purpose other than for the objects of the Trust,
- h) The amounts which are outstanding as at March 31, 2017, for more than one year from the due date are Rs. 23,49,672/- No amounts have been written off during the year.
- i) During the year, tenders were invited where the repairs and construction expenditure exceeded Rs. 5,000.
- j) No money of the Trust has been invested contrary to the provision of section 35.
- k) There has not been alienation of immovable property contrary to the provisions of section 36 which have come to our notice.
- l) No cases of irregular, illegal or improper expenditure or failure or omission to recover moneys or other property belonging to the trust or of loss, or waste of money or other property have come to our notice.

Notes to Financial Statements for the year ended 31st March, 2017

SCHEDULE R

SIGNIFICANT ACCOUNTING POLICIES

1. Basis of preparation of Financial Statements

- The financial statements have been prepared under the historic cost convention on accrual basis in accordance with the generally accepted accounting principles in India, except otherwise stated.
- Government grant is accounted when received.
- Funds :
 - Corpus Fund: Funds received for general purpose and as decided by the management are credited to Corpus Fund Account. Interest earned on investment of Corpus Fund is credited to the said fund account and 75 % of the interest credited is transferred to Income & expenditure Account.
 - H M Patel Centenary Corpus Fund: Funds received for meeting the cost of indigent Cancer patients and interest earned thereon are credited to H M Patel Centenary Corpus Fund Account and 75 % of the interest credited is transferred to Income & Expenditure Account.
 - JTT - CAM Corpus Fund: Funds received from Jamsetji Tata Trust for scholarship to MBBS students and interest earned thereon is credited to Jamsetji Tata Trust -CAM Corpus Fund Account and used for scholarships to needy students.
 - Infosys Foundation: Funds received from Infosys Foundation to provide quality,affordable and concessional medical care to the underprivileged and poor among the rural community. Interest earned thereon is credited to said fund account and the entire amount of interest earned is to be utilised for the said purpose.
- Donations received from communities/institutions for specific purpose are credited to respective earmarked funds and for other than specific purpose are credited to Income & Expenditure Account.

2. Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on date of the financial statement and the reported amount of revenues and expenses during the reporting period. Difference between the actual result and estimates are recognised in the period in which the results are known/materialized.

3. Revenue Recognition

- Income from treatment service is recognised as and when services are rendered.
- Pharmacy income is recognised as and when the medicines are sold.
- Tuition fee is accounted for on accrual basis. Differential amount of fees between NRI category and general category is utilised for Infrastructure Development / payment of scholarships and balance to fee account.

4. Fixed Assets

Fixed assets are stated at cost.

5. Depreciation

Depreciation on fixed assets is provided on the written down value basis at the rates as per the provisions of Income Tax Act 1961 except Life saving medical equipments, which are depreciated at 15% against 40% as per the act. Assets valuing up to Rs.5,000/- are depreciated in the year of purchase.

6. Investments

Investments are carried at cost and provision is made to recognise any diminution in value, other than that of temporary nature.

7. Inventories

Inventories are valued at lower of cost or net realisable value. Inventories include medicines, medical and surgical items, stores, housekeeping materials and other consumables. The cost of Medicines is the actual purchase cost and in case of other items the cost is determined on first in first out basis.

8. Retirement Benefits

- Contributions to Provident Fund and Superannuation Fund are charged to Income and Expenditure Account.
- Gratuity Liability is determined on the basis of number of years of completed service and the last drawn salary as on 31st March, 2017, on actuarial basis as estimated by an independent actuary
- Liability for Leave Encashment benefit is determined on the basis of accumulated leave balance and the last drawn salary as on 31st March, 2017, on actuarial basis as estimated by an independent actuary

9. Library Books

Expenditure on Library Books are charged to Income & Expenditure Account.

SCHEDULE 5

NOTES TO ACCOUNTS

1. Information about the Trust

Charutar Arogya Mandal (the 'Mandal') is a Public Charitable Trust, registered under the Bombay Public Trust Act, 1950 (Reg. no. F / 119 / Anand) and the Societies Act, 1860 (Reg. No. GUJ/ 91/ Anand). The Mandal provides quality medical education and healthcare to the rural community equitably with commitment, excellence, and honesty and at affordable cost to their utmost satisfaction.

Mandal is granted registration under section 12 A (a) of the Income Tax Act, 1961 and its income is exempt under section 11 of the Income Tax Act, 1961. Mandal is also registered with DIT (exemptions) Gujarat u/s 80 G (5) and section 35AC of the Income Tax Act, 1961 (Notification dated July 31, 2014, valid upto March 31, 2017). Mandal also has exemption under section 10(23c) (vi) and (via) of the Income Tax Act, 1961.

VISION AND IMPACT

Mission

To provide modern and professional health care to the rural community equitably with commitment, excellence, honesty and integrity.

Vision

We would offer to our patients, comprehensive and personalized health care with commitment and compassion at an affordable cost, to their utmost satisfaction, while keeping ourselves abreast of the state-of-the-art technology.

IMPACT

The efforts made in fulfilling our mission have had a great impact in the lives of the rural population in the vicinity of the Mandal. Seven extension centres are operated by the Mandal in the adjoining villages, enabling the hospital to take its services closer to the community. Cancer awareness programme in 27 villages has enabled early detection of the disease and thereby its treatment.

Gratitude

- The people of Charotar who generously contributed in so many ways.
- The people of Karamsad and particularly, the Karamsad Municipal Nagarpalika for their continuing support.
- The Tribhuvandas Foundation for their continued assistance.
- The Charutar Vidya Mandal and the Charotar Gramoddhar Sahkari Mandal Ltd, for their help and support.
- The Kaira District Cooperative Milk Producers' Union for their support and help.
- The Vitthal Udyognagar Industries for their support.
- The Government of Gujarat and Sardar Patel University who have offered unstinted support.
- The Santram Mandir, Karamsad for providing free meals to relatives of patients coming from far away.
- Sir Ratan Tata Trust, Mumbai and Sir Dorabji Tata Trust, Mumbai for their generous assistance to the Cancer Project and treatment of poor patients.
- Navajbai Tata Trust, Mumbai for their generous assistance for treatment of poor patients.
- M/s Oil & Natural Gas Commission for their support in the Bone Marrow Transplant Centre.
- M/s Larsen & Toubro Ltd for their support in the Hospital Expansion Project.
- Gujarat Cooperative Milk Marketing Federation for their support during the Charity event.
- Sir Jamshedji Tata Trust for their generous assistance in providing scholarships to meritorious but economically challenged students for the MBBS courses.
- Dr Somjee Family for starting a Somjee Fellowship given to the interns admitted under the Tata-CAM Scholarship.
- Shanti Charitable Trust for supporting the MBBS scholarship students with hostel stay, instrument sets, books, aprons and mess fees.
- Elecon Group of Companies for their generous support in creating the state-of-the-art Cardiac Centre.
- The Public Training Research Centre at Khambhat, Petlad Municipality, Sevaliya Arogya Mandal, Bhadrans Arogya Trust, Agas Gram Arogya Mandal and Anand Agriculture University for entrusting us with the responsibility of managing their centres.
- The honorary consultants and volunteers who have worked selflessly to provide the much-needed support.
- Numerous donors who have been so generous in supporting our projects and activities.
- The countless individuals and institutions who have supported the Charutar Arogya Mandal activities in so many ways and without whose help and encouragement, the Mandal would not have been able to make the progress achieved during the year.
- The dedicated team of doctors and support staff who have worked tirelessly to provide round-the-clock services.
