

11 Day old Baby Girl with  
Sepsis & Acute Respiratory  
Distress Syndrome  
**Her Hope: You.**

When the child of Karismaben Diwan from Sanadara village of Galteshwar Taluka, Kheda District was diagnosed with Sepsis in Lung & Acute Respiratory Distress Syndrome, her self employed father gave up hope.

She is under treatment at Shree Krishna Hospital. She is being presently treated in the ICU with ventilator support. The cost of treatment, along with prolonged hospital stay, would be Rs. 1,75,000 which is unaffordable for a patient belonging to the weaker section of society. But the child hopes and fights on. And with your support, She will win this battle.

Do send or Gift Aid your contribution in favour of Charutar Arogya Mandal at the earliest. The contribution is exempted from Tax under Section 80G.
