

6 Day old Pre-term Baby Boy
with Low Birth Weight
His Hope: You.

When the Pre-term child of Kajalben Chunara from Khambhat Taluka was diagnosed with Respiratory Distress Syndrome with Low Birth Weight, his family of daily-wagers gave up hope.

He is under treatment at Shree Krishna Hospital. He is being presently treated in the ICU with ventilator support. The cost of treatment, along with prolonged hospital stay, would be Rs. 1,15,000 which is unaffordable for a patient belonging to the weaker section of society. But the child hopes and fights on. And with your support, he will win this battle.

Do send or Gift Aid your contribution in favour of Charutar Arogya Mandal at the earliest. The contribution is exempted from Tax under Section 80G.
